SUMMARY

Full Stack Developer experienced in JavaScript based programming with a background in marketing and product/project management in finance, food-delivery and medtech. Passion to solving problems. Looking for a junior web-development position or internship.

TECHNICAL SKILLS

Javascript (incl. React, Node.js, Express), HTML, CSS, Postgres, project management tools (Asana, Trello), Git/GitHub

TECHNICAL PROJECTS

Multi-step form - [Github](#) | [Demo](#)

Well designed multi step form. Tried to make components maximum reusable.

- Used React & Redux.
- Used LocalStorage to keep state and not to lose given answers. (saving to memory is throttled for better performance)
- Custom designed radio and checkbox inputs.

Countries - [Github](#) | [Demo](#)

Allows to filter countries by region to search country by name, to look detailed country info and navigate to neighbors

- Debounced refreshing of search result for making user experience more pleasant
- Dark and light modes
- Carefully worked with provided API response structure to properly display all information

IP address tracker - [Github](#) | [Demo](#)

Gets user ip address and location when loaded. Allows to search location by site name or ip.

- Used Leaflet map and <https://geo.ipify.org/> API
- Used createContext and useContext instead of Redux for practice purposes

Catch colored box minigame - [Github](#) | [Demo](#)

The main purpose of this mini project was to practice at team work. Also used drag-n-drop events and js animations.

- Developed every single feature as a new branch and merged them into main after mutual code review
- Made this project as a teamwork with protected main branch. Together made 75 commits and 27 pull requests

And more in [Portfolio](#)
