Technical projects

Multi-step form - [Git](#) | [Demo](#)

Well designed multi step form. Tried to make components maximum reusable

- Used React & Redux and Express
- Used LocalStorage to keep state and not to lose given answers - saving to memory is throttled for better performance
- Custom designed radio and checkbox inputs

Countries - [Git](#) | [Demo](#)

Filter countries by region or search country by name, and look detailed country info, navigate to neighbors

- Debounced refreshing of search result for making user experience more pleasant
- Dark and light modes
- Carefully worked with provided API response structure to properly display all information

IP address tracker - [Git](#) | [Demo](#)

Gets user ip address and location when loaded. Allows to search location by site name or IP

- Used Leaflet map and IP Geolocation API
- Used createContext and useContext instead of Redux for practice purposes

Color box game - [Git](#) | [Demo](#)

Purpose of this mini project was to practice at team work. Used drag-n-drop events and js animations

- Worked every single feature as a new branch and merged them into protected main-branch after mutual code review
- Together made 75 commits and 27 pull requests
